

Global Village Consulting Inc. and FrontBase Inc. Announces Partnership

Vancouver, BC, May 27, 2003 -- Global Village Consulting Inc. (GVC) partners with FrontBase Inc. to provide a bundled solution for GVC.SiteMaker.

Global Village Consulting Inc. is the global licensee of GVC.SiteMaker, a web-site creation and management application designed for K-12 and higher education. Invented by the University of Michigan faculty and co-developed by GVC, GVC.SiteMaker enables non-technical faculty, students and staff to quickly and easily publish fully functional web sites. In addition, GVC.SiteMaker's administrative features empowers support staff to provide enhanced web-services by improving their ability to centrally manage, control and support the entire network of web-sites and users within one system. GVC.SiteMaker improves communication within universities, colleges and schools between faculty members, students, staff and the general public.

Although GVC.SiteMaker works with any JDBC compliant database, it was important to find a database solution that was cost effective and also fully capable, scalable and robust enough to meet the rigorous challenges set by the GVC.SiteMaker application. "We believe FrontBase Inc. provides leading edge database technology solutions." Says Leon Salvail, CEO of GVC. "Our ongoing relationship and newly created partnership with FrontBase Inc. will allow us to continue to provide excellent back-end support for our GVC.SiteMaker solution."

"Our customers will realize the benefits of this partnership by having the opportunity to purchase a bundled package at a reduced cost that will not only shorten implementation time but will also enhance the over-all GVC.SiteMaker solution," says Robert Van Ginkel, Senior Manager, Marketing & Sales.

Located in Vancouver, BC, Canada, since 1995, Global Village Consulting Inc. (GVC) has provided enterprise application development and consulting services, delivering efficient and cost effective business solutions. GVC's focus is to provide turnkey implementation and software solutions that meet with the specific needs of clients. In addition to developing and marketing GVC.SiteMaker and various other applications such as Hours Tracker, GVC's primary service is to provide back-end / mid-tier project evaluation, development, implementation and hosting services to help clients reach their internet and e-business goals.

Since 1993, with offices in Denmark, UK and Los Angeles, FrontBase, Inc. has been providing database software development and services. FrontBase's database software is one of the few relational database servers that are fully SQL 92 compliant.
